PROFESSIONAL SUMMARY

Senior SAP ABAP Consultant with 4+ years, primarily on one S/4HANA programme (implementation, then production support) for a manufacturing client, plus 10+ offshore support engagements. Delivered reports, interfaces, forms, enhancements, workflows, CDS/OData services and analytical dashboards across MM, SD, FI, CO, PP, PS, PM, HCM, FLM, QM and Basis. Strong in classic ABAP, BAdI/enhancement work, integrations (REST, OData, RFC, Base64/PI hand-offs), Adobe/Smart Forms and upload programs.

Use AI assistants and open-source references (GitHub) to move faster, while owning requirement analysis, design, integration, testing and client sign-off. Working knowledge of CDS views and RAP query providers for dashboards; actively building depth in RAP, AMDP, IDocs and Clean Core.

CORE TECHNICAL SKILLS

- **ABAP:** ABAP OO, Data Dictionary, Module Pool, BDC, BAPI, ALV (classical, interactive, SALV), performance tuning
- **Enhancements:** User exits, customer exits, BAdIs (22 implementations), implicit/explicit enhancements, screen and menu exits, BTEs
- **Integration:** REST APIs, OData V2 (SEGW) and V4, RFC, SAP PI middleware, Base64 file handling
- **CDS and Analytics:** CDS views (requirement-driven), RAP query providers, OData V4 services, ECharts / ApexCharts / Chart.js dashboards
- **Forms and Workflow:** Adobe Forms, Smart Forms, PDF email triggers; Flexible Workflow (PO, PR, SO), custom BOM workflow
- **Fiori / UI5:** Tiles and catalogs, role creation and assignment, standard app activation (OData/ICF), basic Fiori apps, UI5 integration
- **Tools and Automation:** ADT (Eclipse), SAP GUI scripting, Excel VBA, Python, AutoHotkey v2, abapGit, abap2xlsx, AES encryption in ABAP
- **Modules:** MM, SD, FI, CO, PP, PS, PM, HCM, FLM, QM, Basis

PROFESSIONAL EXPERIENCE

Senior ABAP Consultant | Highbar Technocrat Pvt. Ltd. | Client: ALIMCO **Apr 2023 - Present**

S/4HANA Support Project, on-site, Kanpur

ABAP Consultant | Highbar Technocrat Pvt. Ltd. | Client: ALIMCO **Oct 2022 - Apr 2023**

S/4HANA Implementation Project, on-site, Kanpur. Worked with the functional team for a year, then moved into support.

- **Dashboards (CDS + OData V4 + UI5):** GRN, stock-on-posting-date (MB5B), production, SCN, sales target-vs-achievement, zone/scheme-wise sales, performance KPIs, Balance Sheet / P&L, customer-vendor ageing, plant maintenance and BOM. Built on 110+ CDS views, 12 OData V4 service bindings and RAP query-provider classes; front-ends in ECharts, ApexCharts and Chart.js, designed with AI assistance. Background jobs email daily summaries. Validated end-to-end with client sign-off.
- **Integrations:** GEM portal (token, order, invoice, CRAC, payment data and GRN voucher push), delivered over RFC after the ABAP proxy approach was blocked by a Basis connectivity constraint; Metafold API for Warehouse 1 (WC1) transfer and reservation tasks; DATAMAN via RFC function modules (assessment, assessment details, distribution) receiving PS data through SAP PI; Biometric attendance (punch data updated through a custom T-code program and an RFC function module); GST e-Invoice synchronised with billing documents.
- **OData services:** CDS annotation-based RAP/OData reports for plant maintenance orders (service definition and binding), payslip (Base64 PDF) and NOC services for UI5, FLM F4 help, Basis utilities (user lock/unlock, role assignment, password change, transport import over HTTP), Fiori notification link into ME23N.
- **Warehouse 1 (WC1) task management:** Module pool with editable ALV over goods receipts and their 313/315 transfers into the WC1 storage location. Users pick items, quantity and target location, raise a task

ID, and track request-sent, approved, rejected and deleted states with a task log and linked reservation / ready-to-transfer lists.

- **Forms:** 60+ Adobe Form layouts and 10 Smart Forms (PO, STO, goods receipt/reject/return, gate pass, tax invoice, credit/debit note, DPS despatch, loading/packing slip, payment advice, payslip, QM inspection, NOC) with GST variants and PDF email triggers.
- **Reports and Module Pool:** MM (stock on posting date, material documents, GR/PO/PR display, gate in/out, RGP/VRGP), SD (DPS, sales register, pending invoice, transport bill, utilisation certificate), FI (balance sheet notes, user-bucket ageing, vendor balance confirmation, TCS, manual BRS), PP (daily production, BOM, routing with work-centre cost, job work, COOIS), HCM (attendance, punch in/out, deductions, NOC, recruitment).
- **Enhancements:** 22 BAdI and 40+ enhancement implementations: ME21N/ME22N fields and validations, MIRO fields and document type, MIGO/MB updates, reservations, FI document and FBL1N, FBCJ, BP validations, delivery save, sales order and DPS validations, BOM update, COOIS, work order confirmation, QM mails, HCM PA30, STO tax.
- **Workflows:** Flexible Workflows for PO, PR and SO with approval/rejection emails, agent determination, approval-action and rule classes, an approval report, and a custom BOM creation workflow.
- **Upload and migration:** Inventory, sales order, asset (AS01 BAPI), material costing, CK74 cost and material extension uploads; VCH1 and MI02 BDC; customer invoice, advance and travel-advance posting; stock transfer and reservation BAPIs; PM functional-location conversion. Asset upload also automated with SAP scripting and Excel VBA.
- **Finance external number range:** Designed and built from scratch for the Finance transactions (external number include, mapping tables, FBCJ and other enhancements); later reused as the base for another client.
- **Other:** Fiori tiles, roles and standard app activation; custom tables with maintenance generators and number ranges; performance tuning; Python/AutoHotkey Excel-to-chart automation; AES encryption in ABAP using an open-source Rijndael library.

ADDITIONAL ENGAGEMENTS (OFFSHORE IMPLEMENTATION AND SUPPORT)

- **Shivalaya (New Delhi):** Supported about two years after ALIMCO go-live; adapted the ALIMCO external number range design across about 100 Finance T-codes.
- **SECI:** GEM integration (RFC-based); Adobe output as Base64 through OData; print form changes.
- **MoRTH:** PS project and WBS creation changes; PDF-to-Base64 hand-off to PI through a remote function module, storing the signed PDF returned as Base64.
- **NHDC:** Payslip Smart Form fixes (logo, layout, logic); medical reimbursement program; material master upload through BAPI.
- **MEKON:** FB03 new field; VF01 billing-date validation; sales order, infotype 7, business partner, project and WBS uploads; HCM payslip and service PO forms; recruitment report; PMC recommendation program.
- **AZIZI, Sunteck, DRA, MOIL:** PO/GRN validations and purchase register (AZIZI); PO Adobe form and report (Sunteck); journal voucher print (DRA); FLM in-tray fixes (MOIL).
- **Steiner Construction, Pune Metro:** Smart Form logo fixes, including the Pune Metro revenue summary, with the logo retouched for colour and print quality.

CURRENTLY BUILDING DEPTH IN

RAP (managed BOs, behaviour definitions, EML), AMDP and SQLScript, IDocs, Clean Core / ABAP Cloud, and the full CDS feature set. Practice objects for AMDP, IDoc and OData exist in the development system.

EDUCATION

- B.Sc. Information Technology, Dr. Yashwantrao Mohite B.Ed College, Shivaji University: 70%
- Diploma, Electronics & Communication Engineering, Sai Ganapathi Polytechnic College, SBTET: 80%
- 10th (SSC), Sri Vyshnavi Techno School, State Board of Secondary Education: 8.8 GPA

KEY STRENGTHS

Analytical problem solver who traces an issue to its impact across modules; owns end-user problem resolution and works smoothly in cross-functional teams; clear communicator under tight delivery timelines.
